SEMINAR ZAVODA ZA TEORIJSKU FIZIKU

(Zajednički seminari Zavoda za teorijsku fiziku,
Zavoda za eksperimentalnu fiziku i Zavoda za teorijsku fiziku PMF-a)

New way of generating gauge symmetries, e.g. Tensor Field Gravity

Holger Bech Nielsen

The Niels Bohr Institute, Copenhagen, Denmark

Datum: petak 15. travnja 2011.

Vrijeme: 15:00 c.t.

Mjesto: IRB, dvorana I krila

Sažetak:

Imposing a constraint on a field theory (from outside, or of special sort to be explained) there will a priori occur inconsistency with the equations of motion in general. But now we may consider Noethers second theorem and allow ourselves to adjust the coupling constants. Then a gauge symmetry will have to appear. This method of obtaining/deriving gauge symmetry can be used in several examples: electrodynamics, Yang Mills theory, and finally starting from a tensor field gravity (with diffeomorphism invariance).

Voditelj seminara: Dr. Hrvoje Nikolić
